## Urine Drug Testing Information

At Innovative Pain and Wellness (IPW), the safety and wellbeing of our patients is a top priority. When our patients warrant narcotic (opioid) therapy, there are many factors that go into the decision-making process of medication management. As part of our safety and compliance program one of those factors is Urine Drug Testing or “UDT”.

As many of you know, we are undergoing a significant cultural shift at the state and federal level with respect to narcotic (opioid) therapy. In addition to a governmental shift in thinking, there exists a significant change in the medical community in what we call the “local standard of care”. These changes are part of a concerted effort to decrease the associated adverse effects of narcotic (opiate) therapy, and protect you, the patient.

At Innovative Pain and Wellness, we adhere to these federal, state, and local guidelines with respect to narcotic (opiate) therapy. Performing urine drug testing on patients is part of those guidelines. To simplify this process for providers, CMS (Center for Medicare and Medicaid Services) has published guidelines for appropriate UDT. **These guidelines mandate a certain number of screening tests, as well as confirmatory tests, each year for each patient undergoing narcotic (opiate) therapy. For each patient, the number of tests may be different based on differences in treatment and medical history.**

As a courtesy to you, IPW will bill your insurance for the cost of the UDT’s, however, If you should have **questions regarding your UDT billing, explanation of benefits, or bills received, please contact our billing company, RevMD directly at (480)355-3690.** IPW is unable to answer billing questions about urine drug screens.

IPW does offer a prompt pay discount for patients without health insurance of \$119.00. This discount is only available if it is paid the day the specimen is obtained.

I understand that although my pain management provider and staff screens for Coronavirus, there are intrinsic risks of potential exposure to Coronavirus causing COVID-19 or any communicable infection/diseases when coming to a medical clinic and/or having procedures. I feel that the potential benefits of treatment outweigh the risks and choose to move forward.
